Testing Programme Summary

The period under review in this report is 1 April 2019 – 30 June 2019. During this time, the domestic and international Anti-Doping Testing Programme carried out 2212 tests.

For the purposes of this report, UK Anti-Doping defines a test as any attempt to test a single athlete in a single Sample Collection Session. If multiple samples (blood and/or urine) are collected from an athlete in a single Sample Collection Session, this is only counted as one successful test. If the athlete is not located or unavailable for testing, this is defined as one unsuccessful test attempt, regardless of the number of planned samples to be collected from that athlete.

The following table displays the outcome of these tests:

Testing Programme Summary

Successful Tests – Quarter 1	2017
Unsuccessful Test Attempts – Quarter 1	195
Total number of Tests – Quarter 1	2212
Additional Samples collected – Quarter 1 [†]	91
